Mystery of Life and Universe solved! Answer: "LOVE"

"Holy Grail" of science finally discovered

Reichi Yoshita
STAFF WRITER

Said to be the "Holy Grail of Science," unification of the four forces of Nature, namely Gravity, Electromagnetism, the Strong Force, and the Weak Force (in the atom), was finally achieved by a German-Japanese architect, E.S. Hoerdt, residing in Tokyo, Japan. Asked how, as a non-scientist, he was able to achieve the feat, Hoerdt replied, "Probably because I am not a scientist by profession."

Fuller dome at the 1967 Expo in Montreal

known as Fuller domes, and architect of the United States Pavilion at the 1967 Expo in Montreal, Canada. According to Hoerdt, frontier science claims that before material or physical Universe was born, Consciousness reigned. In the beginning, before the Big Bang, there was nothing: no-thing. And out of this nothing, void, vacuum, our Universe was born through some sort of Consciousness, Intent, Will. If such were true, was this Consciousness, Intent, Will benevolent, or malevolent? His answer, benevolent. Why? Because to him everything in this Universe suggests to be so. "Many years ago, I was in a serious car accident and damaged my neck and shoulders very badly. I visited both large, general hospital as well as small clinic doctors, sports masseurs, chyropractitioners, acupuncturists, even so-called new-age healers, but no one was able to help me. One doctor even told me that I would never heal. Desperate,

I visited one last doctor, relatively young and practicing oriental medicine. The first time I met him, he told me, 'Mr. Hoerdt, there are two Forces working in this Universe: Life Force and Healing Force. Needless to say, Life is a miracle; and there is another Force working to keep this Life Force intact, and it is the Healing Force, another miracle. Therefore, you need not worry. Believe me, you will be healed.' I believed him, and I was healed." Hoerdt continues, "Ayurveda, the Indian 'Science of Life,' practically teaches the same. We are designed and programmed (by our DNA, our Memory) to stay healthy. Incredible as it is, we live our daily lives without any pain, and we realize the wealth of health only when we become ill. And it is only when we lose this Memory that we become ill. Therefore, in order to gain back health, all one needs to do is to restore this Memory. Hoerdt also mentions two scientists by the name of

photo:The last whole earth catalog

Lorentzen and Waynestock respectively who have come up with a similar theory. They theorize that our body cells communicate by means of water, and when this communication breaks down, we become ill. How to regain health? Simply restore cell communication. To help this process, they have developed what they call "Micro-clustered Water," which when consumed by our body functions, help restore cell communication to restore health. Scientists are able to "catch" and show on computer screens various "waves" or "vibrations" travelling through space. Basically there are "good waves," called coherent, and "bad waves," called incoherent. Good, coherent waves appear as prettily patterned sine waves, while bad, incoherent waves show no discernible pattern and are not pretty. Dr. Masaru Emoto of Japan treats similar phenomena as such coherent and incoherent waves and has become world-famous for publishing photographs of water crystals. Emoto pastes labels with certain words written on them

onto test tubes filled with water, facing the words to the water. For words such as "Love," "Thank you," "Beautiful," the water forms beautiful crystals. For words such as "Hate," "Fool," and "Ugly," water forms no crystals, and the results are not beautiful. Hoerdt was diagnosed with prostate cancer about six years ago. "All the doctors I consulted said the same, to have surgery, take chemo and/or radiation therapy immediately. Knowing such practice only weakens one's immune system to fight the disease, I refused, and instead frequented a certain enzyme bath introduced by a client/friend of mine whose wife cured herself of breast cancer through this procedure. All cancer and other deadly diseased patients who have overcome their illnesses say in unison, 'Just think of happy things, laugh a lot, enjoy life, live positively, and you will be fine.' I followed their advice and am now living healthily, my cancer under control, if not gone completely. Positive thinking brings positive results. Our mental environment (mind)

has the power to even change our body (DNA), our physical nature. Evidently, our Universe, which I have come to call GOoD DESIGN, is heading toward the good, the right, the beautiful. Our Universe, GOoD DESIGN, is positive, and ultimately Good will prevail over Evil. As such, I am convinced that, after all, it is Love that initially ignited and ultimately will unify the four Forces of Nature, namely Gravity, Electromagnetism, the Strong and the Weak Forces in the atom. Why? Because I do not know any Force stronger than Love." Hoerdt concludes, "Love is the Source and the Generator of GOoD DESIGN. Our Universe, GOoD DESIGN, is nothing but an evolution of Love. GOoD DESIGN= LOVE • EVOLUTION. Science has taught me that Love is not only a biological necessity, but a spiritual as well as a physical necessity. As such, Love is the unifying Force of the four forces of Nature."
